## GTS GENIUS BATTERIES®

Genius Batteries® are the proven solution for simple and efficient battery management.

Each Genius Battery contains a unique memory chip that tracks and stores critical usage information -- independently calculating its *True* State-of-Health in real time.

Genius Batteries tell you when they need to be replaced, making device failure due to a bad battery a thing of the past. A built-in LED indicator provides users with instant and continuous insight into battery health, eventually signaling when the battery requires replacement.

Genius Batteries have the technology you need and the information you want - not too soon and not too late - for improved productivity and performance.

### Genius Batteries® help you...

- Increase worker productivity
- Maximize mobile device performance
- Reduce maintenance costs
- Determine when to reorder, remove, and replace batteries
- Avoid unplanned work stoppages
