

NiceLabel POWERFORMS CLOUD

Control labeling across your supply chain

The Full Spectrum of Labeling Software

NiceLabel PowerForms Cloud

Design labels centrally and let your factories, branches, suppliers, or franchises print from anywhere across the globe.

Take control and be in command

Increase productivity and decrease costs

You're looking for ways to decrease the costs of your label printing processes across your entire organisation and supply chain. You want improved business processes, decreased deployment times and increased productivity. You want your marketing and compliance teams to manage and design your labels centrally.

Improve compliance and accuracy

You want your factories, suppliers, shops or even franchises to be able to print correct labels immediately. You also want to take advantage of the new benefits that cloud services offer—access to a richer set of services, delivered more efficiently, accessible by anyone globally, in real time, and with greater cost predictability.

Customers about PowerForms Cloud

"More and more companies are discovering the enormous potential that lies in the handling of label printing, especially SMEs. In the past, we produced our labels and sent them in a file format to our suppliers. There were always problems with bar code readability"

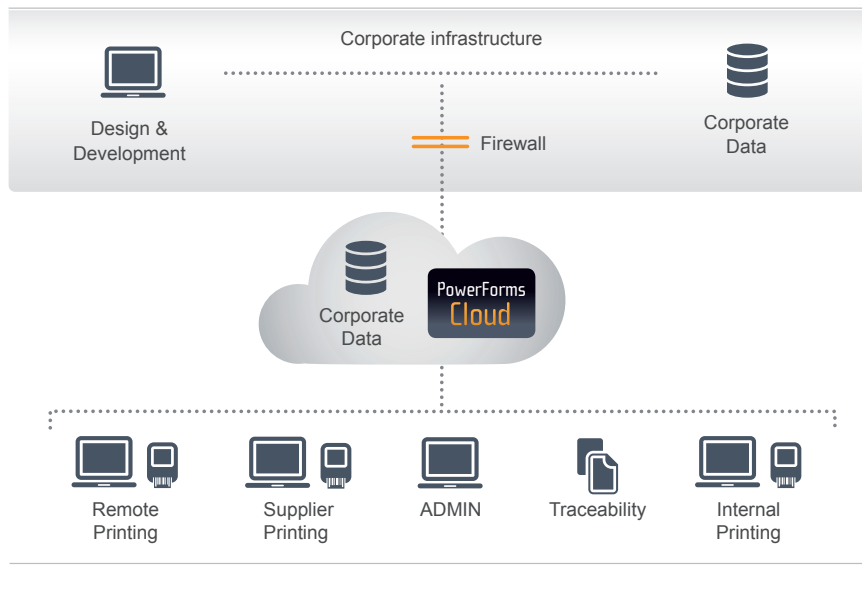

*Jan Schmolke
Food Purchasing Manager
Wollenhaupt GmbH*

Control, reliability and scalability

Central label deployment lets you define standardized labeling.
The cloud delivers instant scalability and built-in redundancy.

The control you want

Centralized management

Correct and approved compliance or promotional label designs.

Accessible globally

Accessible to your factories, branches, suppliers, or franchises via a Web browser.

Supports any printer

Use existing printer infrastructure, supports any printer with a Windows printer driver.

Traceability and visibility

Get real-time visibility with an audit trail and analytics of labeling activities across the entire supply chain.

Take control of your compliance and promotional label printing, reduce barcode and data errors, lower deployment and administrations costs, add transparency to your printing costs, and save more time to focus on your business fundamentals.

The performance you need

Performance and reliability

NiceLabel PowerForms Cloud delivers the performance, features and mission critical reliability previously only available from desktop applications. The Web printing application runs in a browser on the local PC, not on a remote server. Users can install their Windows printer drivers and administer their own print settings – no need for administrators. The application can also be installed on the local computer, so that it can run offline.

“Offline operation allows you to continue to print labels and ship product without an internet connection”

Log in and start printing

NiceLabel PowerForms Cloud can be scaled to tens of thousands of users or down to only a few. The cloud is upgraded and updated without you even noticing, and the whole system doesn't eat up any of your valuable IT resources.

Deploy instantly

The time needed for a new user to print his first labels is measured in minutes. Changes to web applications and label designs are made quickly and deployed globally in seconds. This is unheard of with traditional desktop labeling software.

Only pay for what you use

The way you pay for cloud apps is also different. Forget about buying servers and software, and forget about employing or training staff to maintain them.

The NiceLabel PowerForms Cloud service is rolled up into a predictable monthly subscription, so you only pay for what you use.

Private or locally hosted

NiceLabel PowerForms Web offers the same web technology as NiceLabel PowerForms Cloud without the cloud hosting service. PowerForms Web is available via a traditional license model and not as a monthly subscription. You can host it as you please.
