

SOTI MOBICONTROL CLOUD

MANAGING MULTIPLE MOBILE DEVICES? DO IT IN THE CLOUD WITH SOTI MOBICONTROL

Cloud computing has moved beyond on-the-go data and file access. Organizations of all sizes, industries, and security requirements are using the Cloud for Enterprise Mobility Management (EMM).

As your fleet of mobile devices increase, SOTI MobiControl Cloud is better equipped to keep them productive and connected without compromising security, reliability and cost.

REST EASY WITH IMPROVED SECURITY

SOTI MobiControl Cloud is hosted in the #1 Cloud provider in the world, Amazon Web Services (AWS), with redundancy built in at the hardware and hypervisor levels.

With SOTI MobiControl Cloud, just lock the phone the moment you're notified of its disappearance. Any information on the device is inaccessible, and any information on the Cloud is safe and ready to be downloaded to a new unit.

GET MORE DONE WITH INCREASED RELIABILITY

On-premise servers are vulnerable to instability due to hardware failure, power outages and data corruption. Maintenance is yet another burden. Add it up and you're losing efficiencies.

SOTI MobiControl Cloud delivers 99.9% uptime availability as referenced within your service level agreement (SLA). Cloud resiliency means that many issues are solved prior to them impacting your company's productivity. If disaster strikes, your Cloud infrastructure will be restored with minimal interruption.

BOOST PROFITABILITY BY REDUCING COSTS

How much are you spending on IT training, server upkeep or obsolete programs? How much money is being lost on tools that can't meet the demands of your mobile workers and the devices they use? How much time are you spending justifying your department's budget?

TAKE MORE CONTROL OVER THE COSTS ASSOCIATED WITH EMM

With SOTI MobiControl Cloud, you only pay for the device count. Reduce your overall infrastructure requirements and budget smarter by eliminating cumbersome maintenance expenses and capital costs.

SOTI MOBICONTROL CLOUD: THE BEST OF BOTH WORLDS

SOTI MobiControl Cloud enables you to deploy, oversee and protect business-critical mobile devices from across the street or around the globe. It's the ideal combination of the powerful features of our award-winning SOTI MobiControl management solution with the convenience, control and resiliency of the Cloud.

ISO 27001 CERTIFIED SINGLE-TENANT HOSTING

Your private Cloud infrastructure isn't shared with other tenants. This gives you complete independence and control over versioning of your SOTI MobiControl Cloud infrastructure.

CUSTOM DATA BACKUP AND RESTORATION

Restore your complete SOTI MobiControl Cloud infrastructure in just minutes with a simple phone call. Take better control over the location of your data by choosing the geographic location of your Cloud servers.

ADDITIONAL FEATURES

- Real-time server monitoring by the SOTI Support Team
- No need to purchase Microsoft Client Access Licenses (CALs) for your organization
- Secure hosting within Amazon Web Services
- On-demand rollback to previously saved server snapshots
- Zero-touch maintenance and behind the scenes troubleshooting
- Full control over SOTI MobiControl upgrade requests
