

Which Tablet is Right For Your Public Safety Agency?

Zebra high-performance tablets are mission-ready to meet the unique requirements of your front-line users. Purpose-built for challenging environments, Zebra tablets can endure hazardous conditions, drops to concrete, exposure to water, dust, dirt and more. Our L10 Series and XSLATE R12 rugged tablets are presented here in three popular configurations for Public Safety—Standard, Select and Premium—offering a range of form factors, capabilities and prices to fit virtually any agency's needs and budget. Certified on both AT&T FirstNet and Verizon Public Safety Networks, Zebra helps connect first responders and emergency management personnel with each other and the critical data they need.

IT'S ALL ABOUT THE MISSION:

Flexible Configurations

With Zebra tablets, you can choose the level of durability, display size, form factor, operating system, processing power and accessories to design the solution that best meets your needs. Zebra's L10 rugged series is available with a choice of Windows or Android operating system. The XSLATE R12 is an adaptable Windows-based tablet that delivers great performance in mixed environments.

Versatile Accessories

Boost the durability and functionality of your enterprise tablets with accessories that extend your capabilities and lower the total cost of ownership. Accessories include docking solutions, batteries, chargers and adapters for personnel who must spend long periods of time in the field; keyboards and other input devices for ease of use; and carrying cases designed for public safety professionals.

Advanced Security Protections

Zebra's rugged tablets are protected by enterprise-class security to provide your agency with the visibility, control and security you need to manage and ensure readiness and uptime, all the time. Our tablets comply with FIPS 140-2 and support multi-factor authentication. Zebra's Mobility Extensions (Mx) fortify the Android operating system with application white listing, multi-user login, remote staging, updating, troubleshooting, lock, wipe and device monitoring.

Rugged Reliability

No matter how harsh the conditions your front-line personnel face, Zebra's rugged tablets have seen worse. Built to the rugged standards of MIL-STD 810G, the L10 Series and XSLATE R12 tablets are respectively waterproof and water resistant, dustproof and drop-proof. Drop them on concrete. Get them wet. Use them in extreme heat and subzero cold, inside a truck, car or boat or even in the saddlebag of a horse or motorcycle. Zebra tablets are built to handle it all.

Service and Support

Protect your tablet investment, get peak performance and maximize uptime with Zebra OneCare™ services. Available in 3- or 5-year plans, Zebra OneCare covers everything from normal wear and tear to accidental damage. Our services reduce device vulnerabilities, eliminate unexpected disruptions and unbudgeted repair expenses and give you access to unmatched repair and support from Zebra experts. Rest assured, if it's broken, we'll fix it.

Preserving the Integrity of Your Data

At Zebra, we understand the importance of keeping the sensitive data on your tablets secure. That's where Zebra's OneCare service can help. If you experience a problem with a hard drive, Zebra can send you a replacement upon request. You keep the old drive and maintain complete control of your confidential information—it never leaves your possession.
