

# Benefits of Color Labels for the Warehouse

## Quickly convey inventory specifications

1

Color can be used to convey product information, warn of potential handling hazards, etc.

2

## Easily comply with retail requirements

Fulfillment centers may require unique full-color pictures and color-coded labeling for every item. Plus, standards vary by distributor.

## Prevent loss of pre-print

Design formats continuously change, resulting in huge loss of pre-print. Large runs of pre-printed labels not suitable for small-batch quantities of warehouse inventory.

3

4

## Increase workflow efficiency & branding

Color labels can be used to increase process efficiency, reduce inventory costs, and add branding elements.

## Improve set-up & lower costs

Not only are color printers easier to set up than traditional thermal transfer printers, there is also no more dealing with hard-to-thread ribbons/media or consumable printheads.
