

Edgefinity IoT

Shipping | Asset Tracking | Inventory Management

Edgefinity IoT Overview

Tracking products and materials are vital in manufacturing. But how do you track valued items accurately while improving your operation's efficiency? With RFID technology, manufacturers can see an 80% improvement in shipping/picking accuracy, and a 90% improvement in receiving time. RFID can decrease inspection costs, reduce shipping returns, improve inventory labor productivity, and improve Work In Process accuracy.

Until now, RFID technology required considerable software development at prohibitive costs for most organizations. It was hard to interface with ERPs, WMS, and other applications. These cobbled-together solutions were also difficult and costly to maintain over the years. Consequently, many projects tended to become rapidly obsolete.

Edgefinity IoT Benefits

Tracking parts & labor is important in manufacturing. But how do you do it accurately? Edgefinity IoT's full range goods/asset tracking applications can make it possible for you to see where every manufacturing part is located.

Find Assets/Equipment in Real-Time

Locate assets in real-time, reduce labor costs and improve productivity. With Edgefinity IoT, get a live look of where equipment is from one interface.

Validate Outbound Shipments

Edgefinity IoT allows you to validate every outbound shipment. Every item is recorded at 99.99% accuracy.

Improve Utilization Rates

Lower equipment replacement costs by tracking the usage of your expensive equipment and reusable assets.

Improve Inventory Management

With Edgefinity IoT, you can receive alerts when items run low. And, running cycle counts only takes minutes, so you're always up to date.

Warehouse Management

Rapidly identify, locate, or replenish high value items. Validate putaway placements easily, and ensure correct items are picked.

Track Work in Process

Track items as they move through the manufacturing process. Remove bottlenecks to improve efficiency.

Ready to Explore the Possibilities with RFID?

At RMS Omega, we are a single-source provider for all components of your RFID project.

If you're considering RFID for asset tracking, inventory management, or any other business application, feel free to contact us at info@rmsomega.com or call **888.857.8402** to get answers to your questions, learn more about RFID systems and solutions, and find out how we can help you achieve a successful implementation.
