

RTLS

for Forklift Tracking & Monitoring

With an effective RTLS solution for precise forklift tracking, you can transform your fleet operations by achieving greater efficiency, profitability and safety by cutting down on wasted man hours and, more importantly, preventing accidents on the workfloor. Benefits include:

- Workflow Tracking
- Inventory Location
- Workflow Optimization
- Equipment Utilization
- Personnel Safety

Unlike other indoor location tracking technologies, ultra-wideband real-time location systems provide:

Real-time & Historical Insights into Forklift Operation

Forklift Route Optimization & Warehouse Utilization

OSHA estimates that

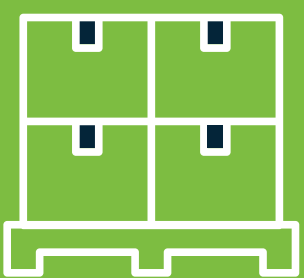

70%

of forklift accidents could be prevented.

Tracking Material Flow while Reducing Worker Injuries

Prevention of Incorrect Unloads

Sewio RTLS ensures up to

30 cm

accuracy in harsh environments.

Improving Forklift Operator Training Using VR
