

Help improve the safety and security of your hospital staff and patients.

Healthcare professionals are 4X more likely to experience workplace violence than other job fields.

Give your personnel access to emergency help at the press of a button. The ProSight Safety badges allow personnel to alert facility security staff quickly and discreetly.

Healthcare workers face increasing levels of violence at work.

Incidences of workplace violence at healthcare facilities is already high, and it's rising at an alarming rate. This makes hospitals – a place that many would assume to be a safe workplace – among the most dangerous places for employees to work. There is an average of 25,000 incidences of workplace assaults that occur in the U.S. every year, and healthcare workers suffer 50% of all assaults. Additionally, 7 out of 10 emergency physicians believe that emergency department violence is increasing. Skyrocketing violence in patient areas – particularly emergency rooms – has made improving security for physicians, nurses, and other staff members a high priority for the healthcare industry.

Discover How ProSight Safety May Help Your Organization

Decrease response time to incidents

Create real-time situational awareness

Prevent workplace violence

Increase employee safety

Improve staff retention

Identifying and Assessing Workplace Violence Hazards

Healthcare workers face significant risks of job-related violence

Under 20% of all workplace injuries happen to healthcare workers.

Yet healthcare workers suffer 50% of all assaults.

PROSIGHT SAFETY

Real-Time Location Solution: Staff Safety

HOW IT WORKS:

- With a press of a button, staff can discreetly request help in time of duress.
- The system activates instant notifications when staff members signal for help.
- Security personnel can receive alerts on their computer, tablets or smartphones while on-the-go to help minimize response time.
- Staff can escalate alerts to request additional help and timely response.
- Staff have a real-time view of all incidents and means to coordinate optimal response.

Enable discreet help requests at the staff's fingertips

INNOVATIVE SOLUTIONS TO TRANSFORM HEALTHCARE SECURITY & SAFETY

The solution provides visibility to a security leader within the hospital. The operational insights include valuable data such as number of staff, overall turnaround time, performance on handling duress alerts and overall patterns of occurring staff alerts.

Smart Location:

- Locate and respond to staff alerts in real-time while on-the-go.
- Identify the precise location of staff, decrease the turnaround time to reach the staff in distress.

Smart Alerts:

- Automatically activate instant alerts and notifications when staff request help.
- Staff can escalate alerts if they are unable to follow-up to get timely response.
- Configure activation of different alerts based on business rules within the application.

TYPES OF WORKPLACE VIOLENCE

According to a study in the New England Journal of Medicine, there are 4 types of violence that can occur in the workplace:

1. The assailant has no association with the workplace or employee.
2. The assailant is a customer or a patient of the workplace or employee.
3. The assailant is a current or former employee of the workplace.
4. The assailant has a personal relationship with the employee but not with the workplace.
