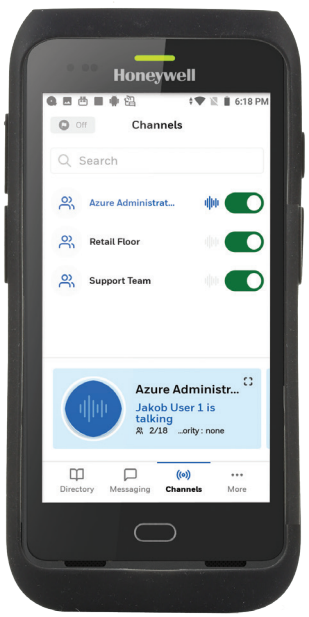
HONEYWELL SMART TALK

An All-in-One Communications Solution
for Today's Mobile Workers

Honeywell

SECURE COMMUNICATIONS SOFTWARE FOR MOBILE WORKERS

Highly mobile and deskless workers often rely on a mix of communication methods to stay in touch and perform collaborative tasks. Training and support is patchy and security an afterthought, making administration an endless headache for IT.



Honeywell Smart Talk is a unified workforce communications solution that tackles the problem of fragmented communications, with enterprise-grade security for Push-to-Talk, Voice Calling, text and media messaging, video, and user presence – all from one device. Honeywell Smart Talk can connects you to your existing phone system. Using your existing network and contact list, workers can make and receive high-quality voice calls over a Wi-Fi or cellular data network connection, ensuring call quality whether speaking with a customer or an employee. Honeywell Smart Talk clients are trusted, secure applications that can act as an extension to your locally hosted or cloudbased PBX. It's the perfect solution for small or large enterprises battling the growing demands of a Bring-Your-Own-Device (BYOD) and mobile workforce.

QUALITY	SECURITY	COMPATIBILITY	FLEXIBILITY
SUPERIOR CALL EXPERIENCE • Call continuity between wi-fi and cellular • Network monitoring on every call • Supports wide range of audio codecs including OPUS and SILK	**ADVANCED ENTERPRISE SECURITY** • Voice and messaging encryption, TLS and Mutual TLS environments supported • MDM ready to lock or remotely wipe containers • Secure RTP support to encrypt video and audio media streams	**RAPID ONBOARDING** • Interoperability with any SIP-Trunk-based call server, PBX and hosted providers • Operating system agnostic (Apple iOS, Android, Web-client) • Platform agnostic (desktop, laptop, mobile, tablet) • LDAP leveraged to provision users quickly	**MANUFACTURER-AGNOSTIC*** • Cloud hosted service (SaaS) • Subscription licensing • Full suite of communications (Chat, Video, Voice, PTT)
