

SureMDM InLocate

Indoor Location Tracking Solution

Spending too much time locating devices in your warehouse? Another rugged device stolen? Often budget to replace lost devices? If your answer is yes, SureMDM InLocate might just be what you are “looking” for.

Losing enterprise devices can be a costly and frustrating experience. If you cannot locate them promptly, you’ll find yourself spending valuable time searching or investing money to replace them. In either case, this can negatively impact worker productivity and compromise data security.

SureMDM InLocate, 42Gears’ indoor location tracking solution, offers real-time device tracking inside any facility without any additional infrastructure. SureMDM InLocate is a game-changer to ensure a secure, efficient, and productive workplace. No more lost devices or wasted time searching.

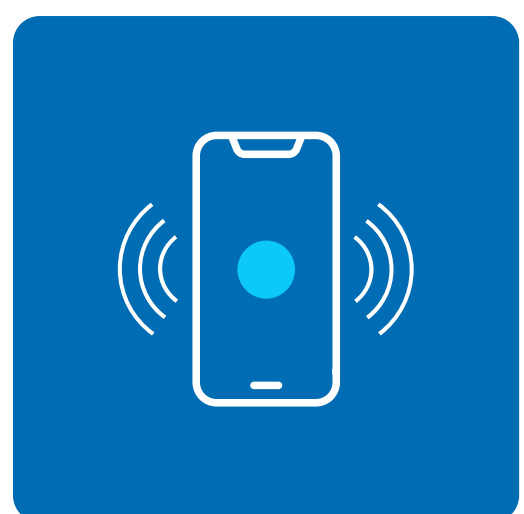

Key Features

Real-Time Tracking

Pinpoint the exact location of mobile devices instantly.

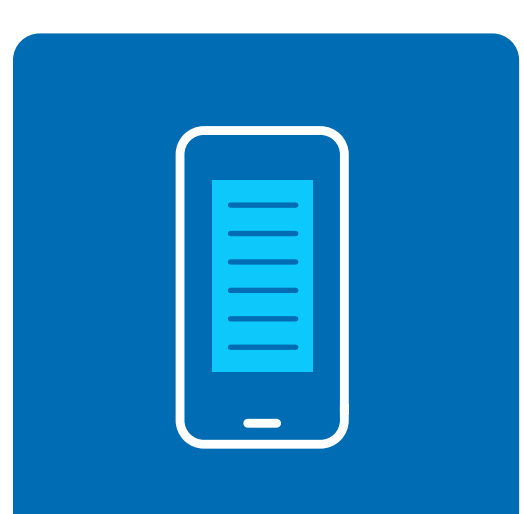

Remote Buzz

Trigger an audible alarm on a lost device for quick retrieval.

Insights

Gain real-time data on device usage, movement patterns, and potential security risks.

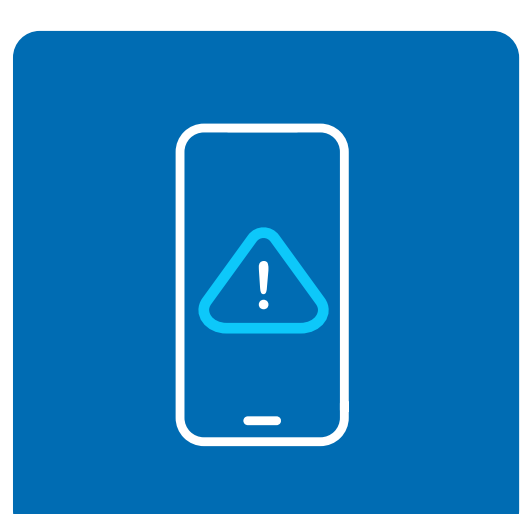

Historical Data

Access and analyze historical location data, identify device usage patterns and optimize workflows.

Geofences

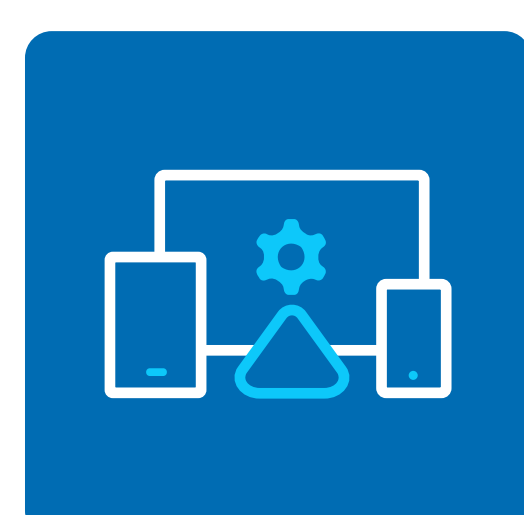

Set virtual boundaries to restrict device movement and enforce security policies (coming soon).

Visual Heatmaps

Identify immobile devices and pinpoint areas with weak Wifi signals for optimal connectivity and device usage. (coming soon)

Complete Device Visibility with SureMDM InLocate

Simplified Setup

Seamlessly integrates with your existing Wi-Fi infrastructure.

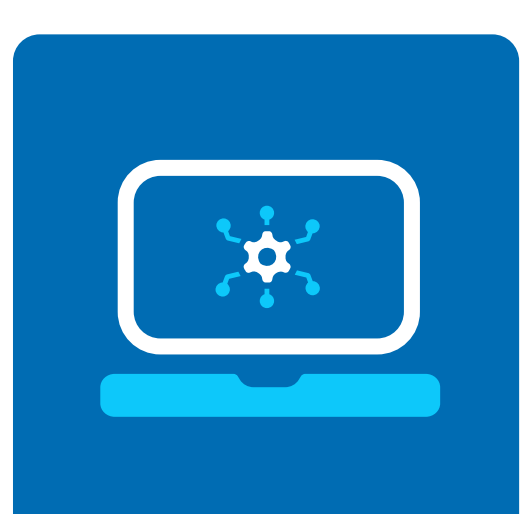

Cost Savings

Eliminate device losses and the need for additional tracking hardware.

Enhanced Security

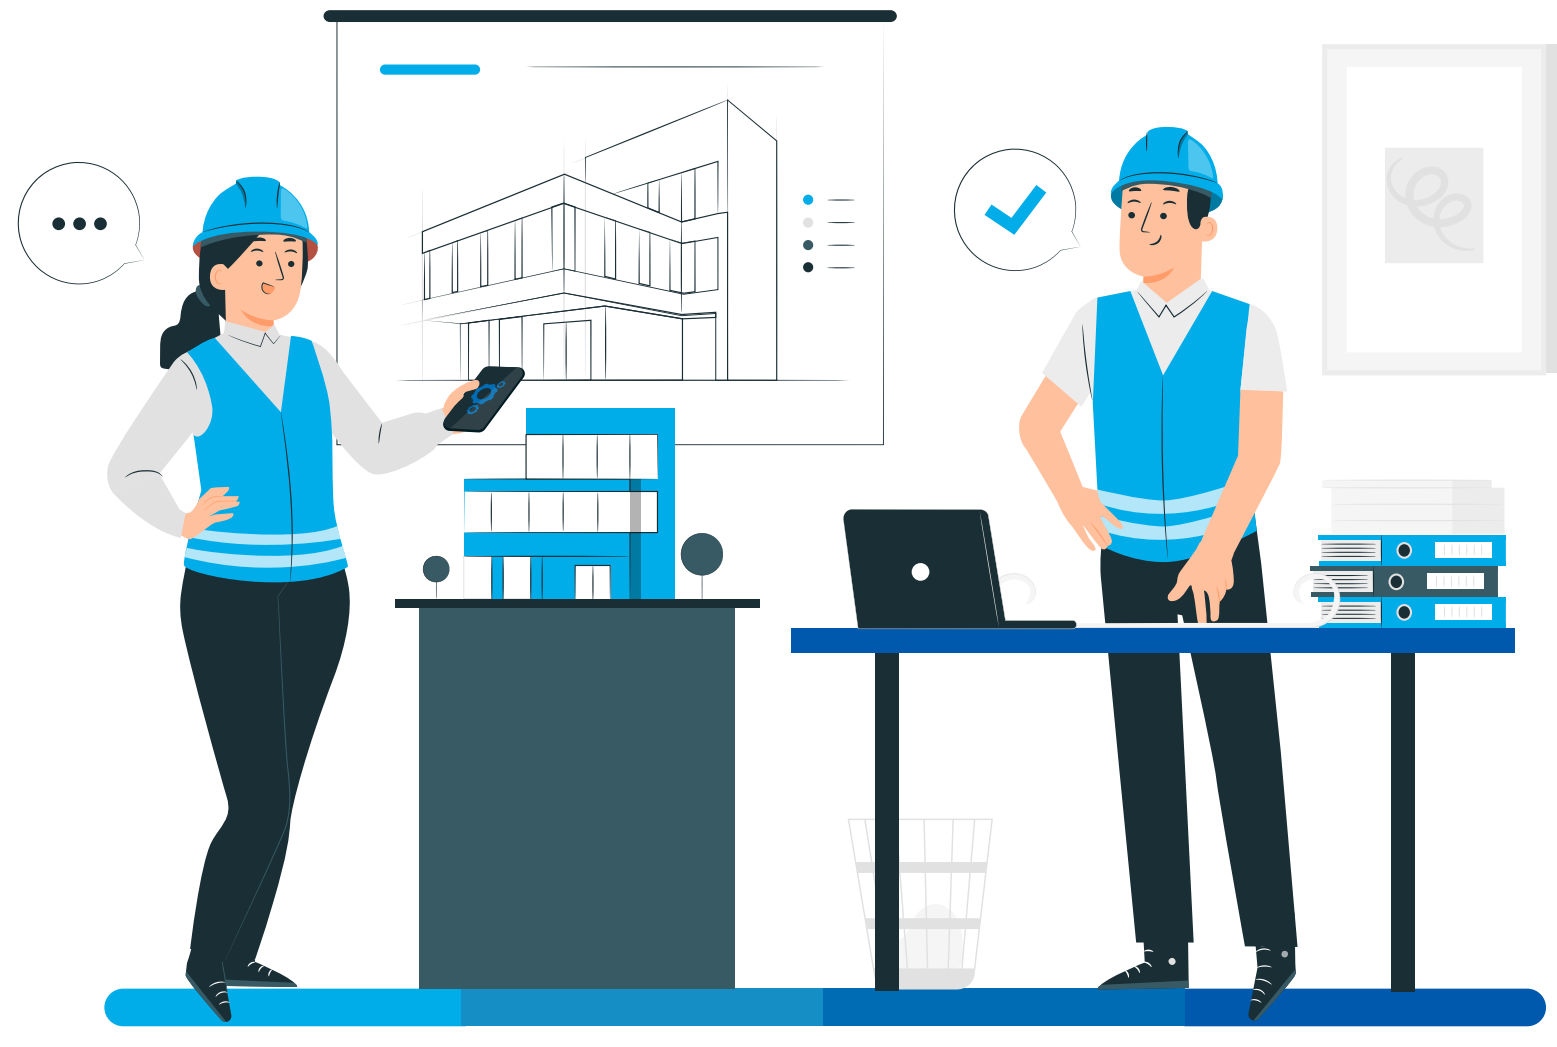

Maintain constant visibility over the location of mobile devices, prevent data theft and safeguard sensitive information.

Operational Efficiency

Reduce time spent searching for missing devices, regain control of your device inventory, and optimize device allocation across various teams.

Perfect for All Industries

Construction

Improve device allocation across teams and reduce the risk of device loss. Streamline workflows and enhance overall project efficiency by locating devices promptly.

Warehouse & Logistics

Optimize inventory management by precisely tracking devices within warehouses. Reduce operational costs, enhance order fulfillment speed, and improve overall logistics efficiency.

Manufacturing

Optimize device management on the manufacturing floor, ensuring timely availability. Minimize device downtime for streamlined production processes.

Retail

Enhance data security by tracking devices. Improve customer service by ensuring device availability, ultimately enhancing the overall shopping experience.

Healthcare

Quickly locate devices to reduce response times and enhance overall patient care.
