

Trust the Reliable Barcode Scanning System for MEDITECH

Overview

StockTaker allows you to perform MEDITECH stock take procedures wirelessly with accuracy and efficiency. The application supports various handheld devices with scanning capabilities, allowing you to easily scan product and inventory barcodes for quick data capture. Alternatively, you can record stock take information using the device keyboard or touch screen.

Improved Accuracy

For peace of mind reliability, StockTaker integrates seamlessly with MEDITECH Materials Management Module.

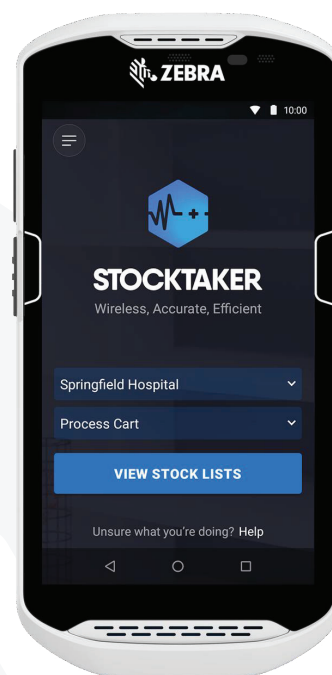

Transaction Types

We support the common MEDITECH MM workflows exactly as you'd expect them:

- Process Exchange Cart
- Patient Issue
- Department Issue
- Department Return
- Physical Inventory
- Inventory Restock Requisition

Quick Setup and Operation

We've refined our installation process to be remarkably quick and easy, and we'll work with your IT department through each step to ensure a flawless deployment. Barcode scanner hardware is made available through RMS Omega.

“**StockTaker is fast and accurate. It's easy to use and plugs right into MEDITECH.**”

- Halifax Health, Daytona Beach, Florida

RMS Omega works with healthcare organizations to design, deploy, manage, and service point of care technology systems. Our trained experts have extensive experience deploying barcoding, data collection, wireless and mobility technologies in hospitals and businesses nationwide. Contact us for assistance with your next project.

“ *StockTaker replaced an aging barcode system with a reliable solution that just works.* ”

- Memorial Hospital, Belleville, IL

Reduced Costs

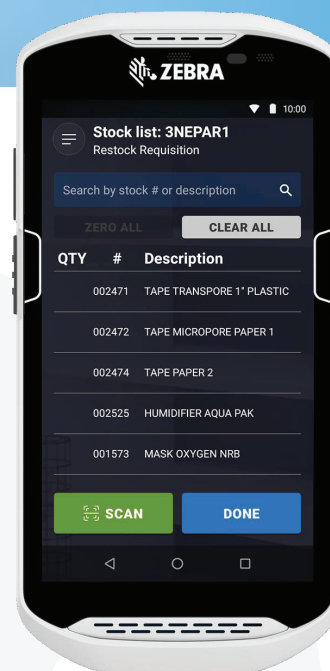

Our software is extremely user-friendly and requires very little training to master the workflows of the device, giving your staff time to do what they're best at.

Wifi Support

Powered by the StockTaker cloud. Wirelessly upload your stock take information without the need to cradle/connect the device to a station, keeping your inventory process flowing. Deploy and integrate seamlessly with your current MM workflows.

Support & Customer Care

We have support staff who thoroughly understand the software inside and out and they will guide you to the quickest and easiest solution to any issue you may have with the software. No jumping through support hoops, we're here for you.
