RMSOMEGA TECHNOLOGIES

Label Pre-Print Services

Labels That Show Up Ready to Work

Barcode and RFID labels: designed, encoded, printed, and delivered on your schedule.

Why Outsource Your Labels?

Approved Before Printing
Test prints and sign-off before every run.

Built-In Compliance
Retailer and regulatory specs set from day one.

Time Back for Your Team
No printer babysitting or reprints.

Make-and-Hold Option
Request finished labels released on your schedule.

Consumables Managed
Labels, ribbons, and serialization handled by us.

Our label pre-print and make-and-hold services help you maintain a reliable label supply without managing production yourself.

What's Included:

- Template design and test prints
- Material, adhesive, and RFID inlay selection
- Product and packaging testing
- Barcode printing and RFID encoding
- Label and ribbon management
- Direct ship or scheduled releases

Supplier Compliance & Traceability

When a label isn't working right, you can get rejected shipments, chargebacks, and gaps in your traceability records. We can print and encode labels to your customers' and regulators' standards so you get it right every time.

Support for Every Sector

Retail
RFID mandates and supplier tagging

Pharma
DSCSA serialized barcodes

Med Tech
FDA UDI

Aerospace & Defense
DoD UID marking

Auto
AIAG standards and grading

Food & Bev
FSMA traceability and food-contact materials

Dealing with a Retailer RFID Mandate?

Major retailers now require RFID tags on inbound goods. We can help you pick the right inlay, test it on your products, and encode to your specs.

Send us your specs and we'll review them with you!

How It Works:

1. Share your requirements
2. Review options and pricing
3. Approve templates and test prints
4. Receive labels ready to apply
